

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

has accepted a call to a chair of biology and neurological research in Denison University, Granville, Ohio; Prof. Wm. G. Tight retains his position in charge of geology and botany. Recent gifts of about \$75,000 are to be largely devoted to the erection and equipment of a scientific building.

The Journal of Comparative Neurology will also be published from Granville under the patronage of Denison University.

ERRATA.

On page 637 in the August No. the date 1882 should read 1862. In the review Erlanger's work upon Paludina (same number) page 709, line 13 for "mouth" read "mantle;" page 712, line 4, for "chiton" read "Amphineura."
